To Whomsoever It May Concern

This to certify that the tested application hosted of the current version is audited by Codec Networks Private Limited (A CERT-In Empaneled Organization Wide Letter No: 3(15)2004 CERT-In (Vol.XI) dated 12.02.2021) and it is free from OWASP vulnerabilities, and any know severe web vulnerability/threat.

Respectively it is safe for hosting and carrying out transactions.

The application has passed Critical / High / Medium vulnerabilities for application security assessment tests.

For detailed description of vulnerabilities and other security assessment related details, please refer to the audit report shared with the respective client.

It is also recommended that the application may be hosted with read and script execution permission for the public with an exact replica of the audited URL in the production environment.

Certificate Validity: The maximum validity of the certificate is One Year from the date of issue.

Note: Our opinion is valid for the period during which the changes are not made in the source of tested application thus any changes in the system will require re-audit of application's new version. Projections of any conclusions based on our current findings will not be applicable and has to be altered for future periods and the application of new versions is subject to any risks because of changes made to the application or system. Also, we recommend that Web Server and OS level hardening need to be in place for the production server.

Thanks & Regards,

Piyush Mittal
